

# LED-illuminated Barrier Gate Arms

**Reduce Accidents and Liability! Light Up Your Barrier Gates.**

**Our brightly colored red and green LED are highly visible day and night. Looks great too!**

## Product Details

Barrier gate accidents are common but preventable with this innovative product. Our patented gate arms have LED lighting built into the arm. The LEDs are bright red when the arm is down and turn bright green when the arm goes up, making the gate arms much more visible to drivers, bicyclists and pedestrians.

- 3" round aluminum pole w/integrated LEDs
- Aluminum track to retrofit existing flat or articulating arms
- Programmable LED controller works with any operator
- DOT reflective tape in varying lengths & widths
- IP68-rated LED strips in 1'-20' lengths
- Available in single or double-sided

Lights are **RED** when in the down position, clearly indicating when the driver must **STOP**.

Lights turn **GREEN** when the arm goes up, clearly indicating that it is okay to **GO**.
